

SAP Materials Management (MM)

Course Overview

The goal of SAP Materials Management is to provide students with a complete knowledge of inventory Management, Procurement using SAP. Project Management and some background of the SAP is also part of the course. Students will learn to perform the functional duties of an MM consultant and develop a strong conceptual and practical knowledge in all areas of MM. They will also learn to create and customize master data related to SAP.

Why Should You Consider MM?

Enterprise Resource Planning system (ERPs) integrates all data and processes of an organization into a single unified system. Most companies need to procure and maintain an inventory and SAP MM is one of the core modules of SAP ERP which is used for procurement and inventory control. This module is in high demand and is a prerequisite to learning. Approximately 80% of the fortune 500 companies uses SAP hence this being a good skill to add to one's profile.
